## Introduction

The following tests were performed on 11 different liquids, which range from tap water, soft drinks, performance drinks, and various types of filtered water.

The Purpose of the tests was to determine the Structural integrity within the cells of the liquids tested, as well as the activity of the electrons and the life force atomic frequency of the tested products. In essence, I am testing which liquids contain the highest Life force and are most beneficial to the human body.

## Testing

Product	General Vitality (How Alive the Water Is) - Higher Value the Better -	<p><b>Reference:</b> The number refers to the Atomic Frequency and Electron Activity Life Force.  --The higher the number, the more electron activity, more positive energy potential and more beneficial life force the item carries.</p> <p>--The lower the number, the less electron activity, less positive energy potential and less beneficial life force the item carries.</p> <p><i>The higher the number value, the better.</i></p>
Jupiter (Delphi) water system	7190	
Jupiter (Melody) water system	3850	
Evian Bottled Water	1067	
Edmonton Tap Water	233.9	
Home Reverse Osmosis System	217.9	
Enagic Kangen Water System	112.8	
Gatorade Rain Berry	90	
Culligan Reverse Osmosis Water	80	
Distilled Water	65	
7up Soft Drink	19.1	
Dasani Bottled Water	15	

## Results / Conclusion

From the above results one can see that the Jupiter Delphi Water System most certainly has the greatest “General Vitality” which is referring to the Atomic Frequency and Electron Activity Life Force, basically carries the highest electron activity and thus the greatest life force out of all of the above tested liquids.

From the above results one can see that the Dasani Bottled Water most certainly has the lowest “General Vitality” which is referring to the Atomic Frequency and Electron Activity Life Force, basically carries the least electron activity and thus the least life force within all of the above tested liquids. (As well as testing with the lowest life force within all of the above tested liquids, Dasani also carried the highest level of magnetic disturbance within the sample tested, which also indicates that the use of the product may also be of little to no nutritional value and may also have a negative effect on any person, plant or animal being whom consumes it, in terms of the energetic integrity of the product and how it would affect someone on a subtle energetic level ie: emotions, energy levels, moods, reduced mental faculties..etc.)

This scale is based on the bio-vibrational electromagnetic frequencies emitted by all individuals and objects on the Supra Physical spectrum of bio photons and atomic vibration. The tests were performed on the VibraScan Frequency Scanner, operated by Rene Hamilton on April 09, 2009.
